ANDREW MARTIN

HELLO@ANDREWMART.IN

Pursuing opportunities to develop beautiful, engaging interactive web applications using clean, beautiful code and the latest technologies.

SUMMARY

Self-taught web development professional, experienced in engineering web applications and web-sites. Leader of several teams of designers and developers; contributor to teams and companies of all sizes. Front-end expert, and back-end adept with a strong knowledge of building, deploying, and maintaining eloquent web-based systems through code reviews, tests, and thorough architecting.

Skills & Languages: TypeScript, JavaScript, GraphQL , Ruby, Python, Agile/Scrum, Git, Bash, SQL

Platforms & Frameworks: React.js/Redux, Node.js, Ruby on Rails, PHP, Amazon S3, Jest, Mocha, CircleCI, Azure

EXPERTISE

Fluent in TypeScript, JavaScript; experienced in frameworks React.js / Redux, GraphQL, Vue.js, Angular.js. Happiest when architecting solutions and APIs to complex problems with brevity and efficiency. Most comfortable when using best practices, test driven development, and pair programming on a team.

EXPERIENCE

SOFTWARE ENGINEER IV - CREDIT KARMA

MAY 2019 to PRESENT

Substantial contributions to a top company priority product (Savings), launched a few months after joining. Developing production ready API's using TypeScript, GraphQL; building front-ends using React.js; facilitating deploy pipelines using CircleCI; shipped fully tested code and test infrastructure; and general all-around contributor to developer efficiency, leading on several custom tools and writing sophisticated documentation for a large team of engineers. Developing code seen by over 100 million users.

SENIOR FRONT END SOFTWARE ENGINEER - LYFT

NOV 2017 to DEC 2019

Experience on both the Developer Platform and Frontend Platform teams, contributing to the React.js, Node.js, and general JavaScript/CSS, including a site-wide rebrand and component library development cycle. Worked with a team of excellent engineers, involved daily in code reviews, sprints, and deployment of production-ready code. Facilitated planning and TDD development of several production components.

FRONT END SOFTWARE ENGINEER - VARIOUS AGENCIES / START-UPS

2008 to 2011

Collaborated with several teams as a front-end web development consultant. Substantial development work in React.js, Node.js; facilitated deployment strategies; Agile/Scrum development; project management, planning, architecting. A sampling of the companies and agencies involved includes: **LEGO, HYFN, DOLLAR SHAVE CLUB, AARP, LIVE NATION LABS, DIRECTV, CATALOGS.COM, BAD ASSEMBLY, WARNER BROS RECORDS, CONDE NAST.**

INTERACTIVE DEVELOPER AND FOUNDER - BELIEVE LABS

Custom website development and consulting for over 125 Clients since 2011. Emphasis on brand development, web/identity, UI strategy, project management, and new business. Sole owner, bookkeeper, founder, strategiest, and Client liason. Supports and managed a team of developers and designers.

LEAD INTERACTIVE DEVELOPER - COHN MARKETING

2004 to 2008

Sole interactive developer, responsible for tethered Web and mobile projects, and maintain hosting environments. Worked on a wide breadth of projects, completing full website builds.

EDUCATION

UNIVERSITY OF COLORADO AT BOULDER
LEEDS SCHOOL OF BUSINESS

B.S. 2008

Bachelor of Science, Business; dual emphasis in Finance and Management.

REFERENCES

> *He successfully contributed to updates to both styling and UX/UI patterns as part of a shared component library, frequently working with a high level of autonomy.*

SETH FIELDS
LYFT

> *I'd strongly recommend Andrew if you're looking for a top notch web developer. If the opportunity arose I'd hire him again.*

KAMYAR MOHAGER
LYFT

> *He jumped in enthusiastically, and was quickly producing high-quality work that I could present to others as an example to follow for future code.*
